|  |  | Application No.                          | Applicant(s)                    |  |  |  |  |
|--|--|--|---------------------------------|--|--|--|--|
| Office Action Summary  |  | 10/666,674                               | ITO, NOBUYUKI                   |  |  |  |  |
|  |  | Examiner                                 | Art Unit                        |  |  |  |  |
|  |  | Dawn Garrett                             | 1774                            |  |  |  |  |
|  | The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply |  |                                 |  |  |  |  |
| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). |  |  |                                 |  |  |  |  |
| Status   |  |  |                                 |  |  |  |  |
| 1)⊠  | Responsive to communication(s) filed on 18 Se  | eptember 2003.                           |                                 |  |  |  |  |
| 2a)□   | This action is <b>FINAL</b> . 2b)⊠ This  | action is non-final.                     |                                 |  |  |  |  |
| 3)   | Since this application is in condition for allowar   | nce except for formal matters, pro       | secution as to the merits is    |  |  |  |  |
|  | closed in accordance with the practice under E   | Ex parte Quayle, 1935 C.D. 11, 45        | 53 O.G. 213.                    |  |  |  |  |
| Dispositi  | on of Claims   |  |                                 |  |  |  |  |
| 4)⊠  | Claim(s) 1-14 is/are pending in the application  |  |                                 |  |  |  |  |
| •  | 4a) Of the above claim(s) is/are withdraw  |  |                                 |  |  |  |  |
| 5)   | Claim(s) is/are allowed.   |  |                                 |  |  |  |  |
| 6)   | Claim(s) is/are rejected.  |  |                                 |  |  |  |  |
| 7)   | Claim(s) is/are objected to.   |  |                                 |  |  |  |  |
| 8)⊠  | Claim(s) <u>1-14</u> are subject to restriction and/or   | election requirement.                    |                                 |  |  |  |  |
| Applicati  | ion Papers   |  |                                 |  |  |  |  |
| 9)[  | The specification is objected to by the Examine  | ır.                                      |                                 |  |  |  |  |
|  | The drawing(s) filed on is/are: a) acc   |  | Examiner.                       |  |  |  |  |
|  | Applicant may not request that any objection to the  | drawing(s) be held in abeyance. See      | e 37 CFR 1.85(a).               |  |  |  |  |
|  | Replacement drawing sheet(s) including the correct   | tion is required if the drawing(s) is ob | jected to. See 37 CFR 1.121(d). |  |  |  |  |
| 11)  | The oath or declaration is objected to by the Ex   | caminer. Note the attached Office        | Action or form PTO-152.         |  |  |  |  |
| Priority (   | under 35 U.S.C. § 119  |  |                                 |  |  |  |  |
| 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:   |  |  |                                 |  |  |  |  |
| 1. Certified copies of the priority documents have been received.  |  |  |                                 |  |  |  |  |
| 2. Certified copies of the priority documents have been received in Application No   |  |  |                                 |  |  |  |  |
| 3. Copies of the certified copies of the priority documents have been received in this National Stage  |  |  |                                 |  |  |  |  |
| application from the International Bureau (PCT Rule 17.2(a)).  |  |  |                                 |  |  |  |  |
| * See the attached detailed Office action for a list of the certified copies not received.   |  |  |                                 |  |  |  |  |
|  |  |  |                                 |  |  |  |  |

Art Unit: 1774

## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-3, drawn to a method of making an EL device, classified in class 427, subclass 66.
  - II. Claims 4 and 5, drawn to an apparatus for making an EL device, classified in class 347, subclass 102.
  - III. Claims 6-8, drawn to a method for making a color filter, classified in class 427, subclass 64.
  - IV. Claims 9 and 10, drawn to an apparatus for making a color filter, classified in class 347, subclass 100.
  - V. Claims 11-14, drawn to an EL display, classified in class 428, subclass 690.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the method may use a preheated substrate and does not require that the heating temperature be controlled.

Inventions III and IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice

Art Unit: 1774

another and materially different process. (MPEP § 806.05(e)). In this case, the method may use a preheated substrate and does not require that the heating temperature be controlled.

Inventions II and V are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, the EL device product may be formed by a different apparatus such as a sputtering apparatus.

Inventions I and V are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the EL device may be formed by a different process such as sputtering.

Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are processes for making two different products. The EL device made by the process of group I does not require a color filter.

Inventions I and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects. Group I is a method for making an EL device which does not

Art Unit: 1774

require a color filter. Group IV is drawn to an apparatus for making a color filter. The color filter making apparatus of group IV is not recited as making an EL device.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects. Group III is a method for making a color filter which does not mention an EL device. Group II is drawn to an apparatus for making an EL device. The EL making apparatus of group II does not mention capability for making a color filter.

Inventions II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects. Group II is drawn to an EL device making apparatus and Group IV is drawn to a color filter making apparatus. An EL device and a color filter are two different products.

Inventions III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. Group III is drawn to a method for making a color filter and Group IV is drawn to an EL device product. The method of group III does not make the product of group IV.

Inventions IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different

Art Unit: 1774

functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. Group IV is drawn to an apparatus for making a color filter and Group V is drawn to an EL device product. The apparatus of group IV does not make the product of group V.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. A telephone call was made to William Park on August 4, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made. William Park requested the examiner to provide a written restriction requirement in a telephone message on August 18, 2004.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dawn Garrett whose telephone number is 571-272-1523. The examiner can normally be reached Monday through Friday during normal business hours. Please allow the examiner twenty-four hours to return your call.

If reasonable attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye, can be reached at 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
